--------	------	-------	---	------------------	--------------	----------------	------------------

Suction- Suspension Sleeves

The following products are approved AADL benefits. A combination of any suction suspension sleeves can be provided to a maximum of \$914.28 per year or a maximum quantity of 6 per year. The maximum price and quantity maximum for each of the sleeves is noted in the schedule. When you are providing a variety of sleeves, you will be responsible to ensure that the client is not provided with more than 12 suspension sleeves/per year or not to exceed a total cost of more than \$914.28 per year. AADL will be closely monitoring the clients who receive more than one type of suspension sleeve. The rationale for providing different types of suspensions sleeves must be documented in the "benefit note". If the quantity maximum or dollar maximum is exceeded, AADL will take a credit if a QFR has not been submitted and approved.

P649	6	1	Contex Gel sleeve - 3 mm transtibial gel sleeve	1	\$133.57	\$100.18	\$33.39
P166	6	1	Easy sleeve heavy duty SFR-24-6HP	1	\$96.39	\$72.29	\$24.10
N100	6	1	Generic Suction Sleeve - 6 per year - see generic pricing procedure - Max. \$240.87	1 or 5			
E505	6	1	Ossur F-0107XX Iceflex Endurance sleeve	2	\$146.79	\$110.09	\$36.70

Tension- Suspension Sleeves

The following products are approved AADL benefits. A combination of any tension suspension sleeves can be provided to a maximum of \$1,026.84 per year or a maximum quantity of 12 per year. The maximum price and quantity maximum for each of the sleeves is noted in the schedule. When you are providing a variety of sleeves, you will be responsible to ensure that the client is not provided with more than 12 suspension sleeves/per year or not to exceed a total cost of more than \$1,026.84 per year. AADL will be closely monitoring the clients who receive more than one type of suspension sleeve. The rationale for providing different types of suspensions sleeves must be documented in the "benefit note". If the quantity maximum or dollar maximum is exceeded, AADL will take a credit if a QFR has not been submitted and approved.

N110	12	1	Generic Tension Sleeve - see generic pricing procedure - Max. \$74.16	1 or 5			
P158	12	1	Neoprene sleeve DKS316 heavy duty or equivalent (no Rx required)	1	\$86.70	\$65.02	\$21.68

Suspension Belts

P173	1	1	Pelvic belt, light	1	\$375.07	\$281.30	\$93.77

<i>Micro-processor Knees</i>							
<p><i>AADL provides a grant to those amputees who are at least a "functional level" 3 and want to upgrade to a micro-processor knee. The grant will be paid directly to the specialty supplier once the micro-processor knee has been provided to the client (service date) . The individual will own the microprocessor knee. AADL will not pay for repairs or maintenance of a microprocessor knee. The quantity/frequency limit of one microprocessor knee grant per five years will be strictly enforced. A client declaration for the microprocessor knee must be completed and signed prior to the authorization being submitted. A copy of this declaration must be kept on the client file in addition to the AADL client declaration form. AADL will not replace any prosthetic knee provided within 2 years due to client preference.</i></p>							
P925	1	5	Microprocessor knee - grant of \$6000 towards the cost of a microprocessor knee.	3

Section: Upper Limb Myoelectric Prosthesis

Upper Limb Myoelectric Prosthesis

1. Clients can be funded for a conventional OR Myoelectric prosthesis.
2. ADULTS: Must have a wearing pattern established by using a conventional prosthesis for at least 1 year - exceptions to be discussed with AADL.
3. CHILDREN - prosthetic fittings:
 - a) body powered-activated terminal device - for at least 1 year prior to Myoelectric fitting.
 - b) first Myoelectric fitting - child must be at least 2 years old.
4. No replacement/repair of a conventional prosthesis for 2 years after a Myoelectric prosthesis has been provided.
5. Wherever possible, Rehab involvement with the functional training of the Myoelectric device is supported by AADL.
6. AADL expectation is that recycled Myoelectric components should be used whenever possible (Exception: Electrodes).
7. Myoelectric benefits are subject to cost sharing on the Maximum Contribution.
8. Total cost of all repairs per device per three year period not to exceed 50% of the cost of a replacement prosthetic device.
9. Total cost of repair to a component is not to exceed 50% of the AADL maximum contribution for that component.
10. Repairs over \$800 contact AADL for prior approval

P858	1	3	Socket costs above conventional socket - WD finishing included	9	\$2,124.00	\$1,624.00	\$500.00
P859	1	3	Socket costs above conventional socket - TR finishing included	9	\$1,991.25	\$1,493.44	\$497.81
P860	1	3	Socket costs above conventional socket - ED finishing included	9	\$3,097.50	\$2,597.50	\$500.00
P861	1	3	Socket costs above conventional socket - TH finishing included	9	\$2,964.75	\$2,464.75	\$500.00
P862	1	3	Socket costs above conventional socket - SH finishing included	9	\$4,779.00	\$4,279.00	\$500.00
P722	1	1	Custom upper extremity liner for use with myoelectric electrodes. Diagnostic liner (88L3=P) and TR Silicone liner with OB fixation (88L1=BA) or TH Silicone liner with OB fixation (88L1=OA)	9	\$1,658.34	\$1,243.75	\$414.59
P852	1	3	4 Channel Processor - Allows switching of operation modes for control with the wrist rotator or locking/unlocking the elbow - Prior Approval to establish contribution based on current pricing method. - "Upgrade"	9	\$2,889.76	\$2,389.76	\$500.00
P813	2	2	Batteries - Prior Approval to establish contribution based on current pricing method. "Upgrade"	9	\$693.99	\$520.49	\$173.50
P818	1	4	Battery Chargers - Prior Approval to establish contribution based on current pricing method. "Upgrade"	9	\$1,106.84	\$830.13	\$276.71
P865	1	3	Battery Mounting Set - Prior Approval to establish contribution based on current pricing method. "Upgrade"	9	\$244.87	\$183.65	\$61.22

Effective Date: April 1, 2012

Revised date: April 27, 2012

Page 29 of 33

Quantity / Frequency = quantity per limb / per number of year(s).

Clients are eligible for ONE Catalogue Number per Grouping (exception: Socks, Repairs).

Prices reflect the maximum contribution by the Alberta Aids to Daily (AADL) Program

Government of Alberta ■

Schedule "A" - Prosthetic Benefits

Cat. #	Qty.	Freq.	Prosthetic Groupings and Catalogue Descriptions	Functional Level	AADL Maximum	AADL Share 75%	Client Share 25%
Upper Limb Myoelectric Prosthesis							
1. Clients can be funded for a conventional OR Myoelectric prosthesis.							
2. ADULTS: Must have a wearing pattern established by using a conventional prosthesis for at least 1 year - exceptions to be discussed with AADL.							
3. CHILDREN - prosthetic fittings:							
a) body powered-activated terminal device - for at least 1 year prior to Myoelectric fitting.							
b) first Myoelectric fitting - child must be at least 2 years old.							
4. No replacement/repair of a conventional prosthesis for 2 years after a Myoelectric prosthesis has been provided.							
5. Wherever possible, Rehab involvement with the functional training of the Myoelectric device is supported by AADL.							
6. AADL expectation is that recycled Myoelectric components should be used whenever possible (Exception: Electrodes).							
7. Myoelectric benefits are subject to cost sharing on the Maximum Contribution.							
8. Total cost of all repairs per device per three year period not to exceed 50% of the cost of a replacement prosthetic device.							
9. Total cost of repair to a component is not to exceed 50% of the AADL maximum contribution for that component.							
10. Repairs over \$800 contact AADL for prior approval							
P825	3	3	Connection Cables - Prior Approval to establish contribution based on current pricing method. "Upgrade"	9	\$271.22	\$203.41	\$67.81
P836	1	3	Elbow - Prior Approval to establish contribution based on current pricing method. "Upgrade"	9	\$8,203.28	\$7,703.28	\$500.00
P837	1	3	Electric Hands & Hooks - Prior Approval to establish contribution based on current pricing method. "Upgrade"	9	\$10,210.20	\$9,710.20	\$500.00
P863	1	3	Electric Wrist Rotators - Prior Approval to establish contribution based on current pricing method. "Upgrade"	9	\$3,124.45	\$2,624.45	\$500.00
P838	2	3	Electrodes - Prior Approval to establish contribution based on current pricing method. "Upgrade"	9	\$1,158.81	\$869.11	\$289.70
P839	1	2	Switch Control - Prior Approval to establish contribution based on current pricing method. "Upgrade"	9	\$1,425.92	\$1,069.44	\$356.48
P853	1	3	Wrist Units - Includes: Lamination Ring, Coupling Ring, Coaxial Plug - Prior Approval to establish contribution based on current pricing method. "Upgrade"	9	\$595.33	\$446.50	\$148.83
P940	1	3	MyoWrist Flexion Unit 10V40	9	\$1,471.61	\$1,103.71	\$367.90
P864	1	1	Recycle of Myoelectric Component - Prior Approval. Cost of rebuilt component by manufacturer, shipping, plus labour hours to disassemble and install into new prosthesis.	9

AADL FUNCTIONAL LEVELS PROSTHETICS

In consultation with the client, it was determined that the prosthesis to be provided would enable the client to achieve the following functional outcome:

LOWER LIMB

LEVEL 0	Does not have the ability or potential to walk or transfer safely with or without assistance and a prosthesis does not enhance their quality of life or mobility.
LEVEL 1	The ability or potential to use a prosthesis for transfers or walking on level surfaces at a fixed pace. This prosthesis is typical for the household walker.
LEVEL 2	The ability or potential for walking over low-level barriers such as curbs, stairs or uneven surfaces. This prosthesis is typical for the limited community walker.
LEVEL 3	The ability or potential for walking with a variable pace. This type of prosthesis is typical of the unrestricted community walker performing daily activities that demand prosthetic use beyond the simple walking needs of the limited community walker.
LEVEL 4	The ability or potential for prosthetic walking that exceeds basic walking skills. These skills may exhibit high impact, stress or energy levels. This prosthesis is typical for the prosthetic demands of the child or active adult functioning in the community.

UPPER LIMB

LEVEL 5	The ability to enhance a patient's body awareness to improve quality of life and or prepare for the patient's future functional ability.
LEVEL 6	The ability to use the prostheses for basic hand skill activities. Generally, these activities are required for lifting, stabilizing or holding objects between two extremities.
LEVEL 7	The ability to demonstrate a high level of function with the prosthesis that enables that enables a client to perform sophisticated, hand skill patterns. Some typical activities would include grasping and releasing, positioning (pre-position) of the terminal device, or changing to alternate terminal devices.
LEVEL 9	The ability to demonstrate a high level of function with a myoelectric prosthesis that enables a client to perform sophisticated, hand skill patterns.

Generic pricing procedure

1. To determine the price to invoice AADL for the generic catalogue number, use the AADL generic pricing calculator
2. Enter the manufacture name and manufacturer part number and the component cost from the manufacturer into the generic price calculator
3. Copy and paste the generic pricing calculation line into the summary sheet tab at the bottom of the calculator **and** the authorization benefit note
4. Create claim on ebusiness
5. If the price calculated by the generic price calculator is greater than the AADL maximum, contribution for the generic catalogue number on the Schedule, contact AADL
